FOREWORD

This edition of **BROADCASTING STATIONS OF THE WORLD** lists all reported radio broadcasting and television stations with the exception of those in the United States of America which broadcast on domestic channels.

Part I (Blue Cover) AMPLITUDE MODULATION broadcasting stations: Information is indexed alphabetically by **COUNTRY** and **CITY**. Within a city, stations are listed in ascending order of frequency. Multiple listing of the same station on different frequencies does not necessarily indicate the number of transmitters, since one transmitter may operate on different frequencies at different times. Other information includes call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

Part II (Green Cover) AMPLITUDE MODULATION broadcasting stations: Information is indexed according to **FREQUENCY** in ascending order.

Part III (Maroon Cover) FREQUENCY MODULATION broadcasting stations: Two sections, one indexed alphabetically by **COUNTRY** and **CITY**, and the other indexed by **FREQUENCY** in ascending order, include the same elements of information as Parts I and II.

Part IV (Brown Cover) TELEVISION stations: Two sections, one indexed alphabetically by **COUNTRY** and **CITY**, and the other indexed by **FREQUENCY** in ascending order, include the same elements of information as Parts I, II, and III plus additional data to distinguish audio, video, polarization, and other technical factors which may apply.

The column headings covering all data listed in Part III are defined as follows:

COUNTRY: The name of the country in which the facility is located. Owing to format limitations of the data-processing equipment, the popular rather than the full official name is used for some countries. Colonies, protectorates, mandates and overseas territories are generally treated as countries for the purposes of this publication.

CITY: The announced location of the station. It is usually the studio location, since most FM transmitters are placed upon the highest location in the area in order to obtain more widespread coverage. Wherever possible, the transmitter location follows the name of the city. In a few cases the area where the transmitter is located is given on the second line of the entry.

SYMBOLS: Status denoted by symbols may change at any time after publication of this edition. See page following foreword.

CALL LETTERS: Letters and/or numerals used for station identification purposes. Many countries do not assign call letters to broadcast services, hence the numerous omissions.

SLOGAN: The name applied to a station for identification purposes in lieu of or in addition to call letters. The station name has been reduced in some cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.

POWER: Stated in watts. All entries which show an asterisk (*) reflect the effective radiated power (ERP) due to the station's antenna system. All other entries give the actual rated power of the transmitter.

FREQUENCY: Expressed in kilocycles per second. For various reasons stations may at times utilize frequencies which are at variance with this publication.

ADDITIONAL INFORMATION: Certain entries will carry additional information on the second or third line concerning the programs carried.

BROADCASTING STATIONS OF THE WORLD

PART IV

TELEVISION STATIONS

1 JUNE 1966

FOREIGN BROADCAST INFORMATION SERVICE

WASHINGTON, D.C. 20505

TWENTIETH EDITION

PART IV

TELEVISION STATIONS

**INFORMATION CORRECTED TO
1 JUNE 1966**

3845
Un 2986
1966
pt 2

FOREWORD

This edition of **BROADCASTING STATIONS OF THE WORLD** lists all reported radio broadcasting and television stations with the exception of those in the United States of America which broadcast on domestic channels.

Part I (Blue Cover) AMPLITUDE MODULATION broadcasting stations: Information is indexed alphabetically by **COUNTRY** and **CITY**. Within a city, stations are listed in ascending order of frequency. Multiple listing of the same station on different frequencies does not necessarily indicate the number of transmitters, since one transmitter may operate on different frequencies at different times. Other information includes call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

Part II (Green Cover) AMPLITUDE MODULATION broadcasting stations: Information is indexed according to **FREQUENCY** in ascending order.

Part III (Maroon Cover) FREQUENCY MODULATION broadcasting stations: Two sections, one indexed alphabetically by **COUNTRY** and **CITY**, and the other indexed by **FREQUENCY** in ascending order, include the same elements of information as Parts I and II.

Part IV (Brown Cover) TELEVISION stations: Two sections, one indexed alphabetically by **COUNTRY** and **CITY**, and the other indexed by **FREQUENCY** in ascending order, include the same elements of information as Parts I, II, and III plus additional data to distinguish audio, video, polarization, and other technical factors which may apply.

The column headings covering all data listed in Part IV are defined as follows:

COUNTRY: The name of the country in which the facility is located. Owing to format limitations of the data-processing equipment, the popular rather than the full official name is used for some countries. Colonies, protectorates, mandates and overseas territories are generally treated as countries for the purposes of this publication.

CITY: The announced location of the station. It is usually the studio location, since most TV transmitters are situated upon the highest location in the area in order to obtain more widespread coverage. Wherever possible, the transmitter follows the name of the city, or in certain cases, the second line of entry will show the area served by the transmitter.

CALL LETTERS: Letters and/or numerals used for station identification purposes. Many countries which normally assign call letters to broadcast services have not required TV stations to broadcast or exhibit call letters, hence the numerous omissions.

SLOGAN: The name announced by or applied to a station for identification purposes in lieu of or in addition to the call letters. The station name has been reduced in many cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.

SYMBOLS: Status denoted by symbols may change at any time after publication of this edition. See page following foreword.

MODULATION: Two systems of modulation are used to transmit the audio signal of the television stations, either frequency modulation (FM) or amplitude modulation (AM). All video transmissions are normally amplitude modulated.

POLARIZATION: Signals are horizontally polarized (HP) or are vertically polarized (VP). Polarization is usually selected according to the need for a reduction of interference with other stations, or to obtain engineering standards as required by the government of the country in which the station is located.

BAND WIDTH: Shown in kilocycles and represents the limits within which both the video and audio transmission are contained.

LINES: Expressed as the number of lines transmitted to form one complete frame or picture.

FRAMES: Stated as the number of times per second the picture area is completely scanned.

VIDEO POWER: All entries are stated in watts. The entries which show an asterisk (*) denote the effective radiated power (ERP) due to the station's antenna system. All other entries give the actual rated power of the transmitter.

AUDIO POWER: The same remarks apply as for the video power.

VIDEO FREQUENCY: Stated in kilocycles per second. The relationship between the quoted figure and the limits of the video band varies among countries and can be determined by reference to the standards of the systems used by the respective countries. See appendix for details.

AUDIO FREQUENCY: Stated in kilocycles per second. The relationship between the quoted figure and the limits of the audio band varies among countries and can be determined by reference to the standards of the systems used by the respective countries. See appendix for details.

ADDITIONAL INFORMATION: A table of television standards is appended to Part IV.

CHARACTERISTICS OF TELEVISION SYSTEMS

(As indicated in C.C.I.R. Report 308, Xth Plenary Assembly, Geneva, 1963)

System	Number of lines	Channel width Mcs	Vision band-width Mcs	Vision/sound separation Mcs	Vestigial sideband Mcs	Vision modulation	Sound modulation
A	405	5	3	-3.5	0.75	Positive	AM
B	625	7	5	+5.5	0.75	Negative	FM
C	625	7	5	+5.5	0.75	Positive	AM
D	625	8	6	+6.5	0.75	Negative	FM
E	819	14	10	± 11.15	2	Positive	AM
F	819	8	5	+5.5	0.75	Positive	AM
G	625	5	5	+5.5	0.75	Negative	FM
H	625	8	5	+5.5	1.25	Negative	FM
I	625	8	5.5	+6	1.25	Negative	FM
K	625	8	6	+6.5	0.75	Negative	FM
L	625	8	6	+6.5	1.25	Positive	AM
M	525	6	4.2	+4.5	0.75	Negative	FM
N	625	6	4.2	+4.5	0.75	Negative	FM

Field frequency: System M, 60 cycles per second, all other systems 50 cycles per second.

Picture frequency: System M, 30 cycles per second, all other systems 25 cycles per second.

Line frequency: System A, 10.125 Kcs, system E, 20.475 Kcs, system M, 15.75 Kcs, all other systems, 15.625 Kcs.
